

AI-Driven Customer Retention Strategy & Intervention Framework

1. Executive Summary

Deploying predictive churn scoring enables the Customer Success team to trigger automated interventions 60 days before contract renewal, projected to save \$1.2M in annual recurring revenue.

2. Tiered Intervention Playbook

Risk Score	Tier	Automated Action	Team Owner
> 0.75	Critical	Direct outreach call within 24h + 25% renewal incentive	VP Customer Success
0.50 - 0.74	Moderate	Personalized onboarding review + feature training invite	Account Manager
< 0.50	Low	Standard monthly product newsletter and check-in	Automated Marketing
